General Comment

We cannot give up our right to copyright and protect our work and intellectual property so that Big Tech can get away with the biggest theft in history.

Copyright laws protect all of us, but especially individual creatives who are most at risk of being destroyed if AI companies get to do whatever they want.

I am not allowed to steal just because I need things that I cannot pay for— why should it be any different for Big tech?

They are not special. Nobody asked for this technology, especially not the way that it's being used today. They act like AI is the next big thing but the reality is most Americans don't want it, nor do they want their privacy and rights invaded in order to have this technology imposed upon them.

AI needs to be developed ethically and within the bounds of the law. It is not right that American copyright is destroyed simply because people with access to money and legal representation want it and can afford to hire lobbyists.

I am an American and I have a legal right to the work I create. Just because someone can steal something doesn't mean they should and they certainly shouldn't be allowed to just change the law so that their theft disappears.

AI tech can only work if they steal from literally everyone who has ever posted anything online. It's 2025. We no longer live in a world where being online is optional. We need laws to protect Americans from unscrupulous tech companies.

I'll say it again—I am not allowed to steal just because I need things that I cannot pay for— why should it be any different for Big tech?
