

PUBLIC SUBMISSION

As of: March 21, 2025
Received: March 15, 2025
Status: [REDACTED]
Tracking No. m89-r8wc-h5af
Comments Due: March 15, 2025
Submission Type: API

Docket: NSF_FRDOC_0001

Recently Posted NSF Rules and Notices.

Comment On: NSF_FRDOC_0001-3479

Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-1713

Comment on FR Doc # 2025-02305

Submitter Information

Name: Paul Rupp

General Comment

Removing copyright restrictions and allowing unfettered use of corporations to images, media, and data that they don't have the rights to will honestly destroy any and all creative media, let alone private property. As an artist, this threatens my livelihood and that of all others in creative fields. These AI systems take information (which they already don't own the rights to use) and cobble together amalgamations of all these points of data and images, making something that is oftentimes the same or similar to what it took from. How one can recognize this as something useable or innovative is unbelievable. In Thaler v. Perlmutter, a federal court ruled that AI-generated artwork cannot be copyrighted, and one cannot own the legal rights to something made with AI. If the whole reason is to be leading in an artificial war with other countries' tech spheres, it's a moot point because of that.

Aside from the creative-focused ethical issues, AI development and usage causes a massive toll on the earth. In a 2021 research paper, scientists from Google and the University of California at Berkeley estimated the training process alone consumed 1,287 megawatt hours of electricity (enough to power about 120 average U.S. homes for a year), generating about 552 tons of carbon dioxide. That's just from training, not even the use of said models. In addition, the models would need to be regularly retrained and replaced, causing exponential damage to our planet.

In short, further focus and development of AI is not wanted, but will overall harm our industry. This has already gone on long and far enough, don't let it get worse.
