Submitter Information

Name: Janice

Kirkpatrick

General Comment

Good evening,

I am an artist (amongst other things) and come from an artist family. I learned through a fellow researcher George Webb, on X (he is a famous intellectual citizen journalist) about Suchir Balaji and that he was killed (not a suicide) due to the fact that he was a New York Times whistleblower working on Open Ai and was about to be interviewed by Associated Press the night before he was found dead in his apartment. He was going to say and show on a special hard-drive that went missing, that Ai was "scraping" ie using everything it could get its robotic hands on to exploit itself as fine and dandy.

Well, this just didnt sit well with us and we decided to get involved, not only in trying to find Justice for Suchir, but also to speak out against Ai and its scraping the web of everything and everyone, in the name of "learning".

I am aware that algorithms and cookies track us, but this goes deeper in that copyright laws are being broken. This is a very big deal and goes against privacy laws amongst other things. I myself have been the victim of intellectual property theft, which I am powerless at the moment to do anything about because of my finances and also just not knowing where to begin.

Us little people who are robbed by the big guys who think they can just take whatever they want and get away with it, will see their day in court. One way or another Justice will prevail, because God is watching all of us, not just technology and Ai.

I pray that you science guys can hear us and just know that our work is ours and Bill Gates, his cronies, all the billions of dollars going into this project are just parasiting off the creatives, and its just not OK with us.

Thank Q for your time,

Janice Meyer Kirkpatrick
