General Comment

Any AI policy and law needs to acknowledge and respect the creators of the data used in training models or generating content. Artists, writers, programmers, etc. need protection for their efforts and compensation for its use. If any AI company or project cannot succeed without unlimited free access to copyrighted material, that company or project does not deserve to succeed.

We cannot afford to create a system that strongly disincentivizes creatives from producing the very content necessary for a generative AI system to even be possible.
