As of: March 21, 2025
Received: March 15, 2025
Status: [REDACTED]
Tracking No. m89-u6wq-m2z0
Comments Due: March 15, 2025
Submission Type: API

Docket: NSF_FRDOC_0001

Recently Posted NSF Rules and Notices.

Comment On: NSF_FRDOC_0001-3479

Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-1730

Comment on FR Doc # 2025-02305

Submitter Information

Name: Rachael Cross

General Comment

Gutting copyright laws in order to expedite the creation of a tech monopoly is an unspeakably short-sighted move. Swaths of the creative industries will be obliterated with no jobs to replace them, and no promise of further profits on any copy in the future. You would be signing away to OpenAI all present and potential profits so that you can rent those profits back from them. It sets a dangerous precedent in which the ownership of any intellectual property is arbitrary.

To cede to OpenAI's demands would, in turn, make it so that OpenAI themselves have no legal defense of their "own" materials unless the government were to extend them special privileges. Again, these changes serve no one except for AI companies, another shift towards consolidating wealth into the hands of a few powerful owners.

If President Trump and, indeed, the government at large, cares for the American legacy, then they should understand that demolishing the creative industry to further empower tech will only tarnish America's cultural power and influence. What use is Hollywood, what use is any entertainment— if we have completely disconnected these things from the people who create them? If all that matters is the AI race between America and China, then there's essentially no difference between anything that anyone makes. They all draw upon the same dataset in the end, the stolen works of all artists, including me.

The only reason there is any value in anything is because of human people. Humans create, and humans enjoy what is created. This is a critical moment where America should be an example to the world of a nation that it understands the value of its citizens, that prioritizes quality over the pointless quantity of AI. Art in America should be encouraged and celebrated, not degraded and outsourced to machines for the sake of short term profits.
