

PUBLIC SUBMISSION

As of: March 21, 2025
Received: March 15, 2025
Status: [REDACTED]
Tracking No. m89-v069-et33
Comments Due: March 15, 2025
Submission Type: API

Docket: NSF_FRDOC_0001

Recently Posted NSF Rules and Notices.

Comment On: NSF_FRDOC_0001-3479

Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-1737

Comment on FR Doc # 2025-02305

Submitter Information

Name: Sandra Felty

General Comment

Adhering to current copyright law needs to be a priority in any AI advancements. The entire purpose of copyright is to ensure that people who make great things, works, and advancements in any field will be rewarded for that. This is the absolute foundation of a meritocracy and cannot ignored. Ignoring this would also announce that nothing is subject to copyright including AI and it's code and data base, which would be an actual threat to national security given the sheer and honestly unknown scope of the data that existing companies have taken largely without permission from apps like the Adobe Suite that handle confidential information frequently.

Please consider the damage that allowing AI to bypass copyright would do to almost every field, as most word processors have begun scraping data from us regardless of what sort of work is being done on them. I would like to see our country make advancements in automating jobs that are actually menial and difficult instead of focusing on the things we were promised that industrialization and automation would give us more time to do like painting, writing, and all the other things that make life worth living.
