General Comment

I'm an independent artist and have huge concerns about generative AI. It's been built on stolen art that working Americans have created, completely disregarding intellectual copyright laws. As someone that makes their living from their art, I need these gen AI programs to be opt in only, with fair compensation if someone chooses to do so. Creative jobs are disappearing, being replaced by Gen AI, which is a complete affront to the people who's work is needed to build the AI in the first place. I also ask that we consider the extreme water and energy demands of AI, and look to solutions for mitigating the demand. Resources are finite, and to use so much for something that puts people out of work while providing a lesser algorithmic compilation of better art, makes no sense.
