General Comment

This action plan claims that “continued U.S. AI leadership will promote human flourishing, economic competitiveness, and national security.”

In reality, AI technology has proven to stymie human expression by condensing hundreds of thousands of artists’ work into homogenized imagery devoid of meaning; it’s proven to promote laziness in marketing, spurring consumer disinterest and all but guaranteeing economic failure; it’s proven to be a major security risk due to how easily LLMs can have their initial parameters overwritten with minimal effort or wile.

Promoting the development of AI technology comes at the detriment of the American populace, rich and poor alike. What is being passed as a cost-saving miracle technology is the latest in a long line of snake oils peddled by Silicon Valley, and will only further embarrass the US on the world stage.
