General Comment

Letting AI use the intellectual property of artists against their will devalues human thought, ingenuity, creative thinking, and ambition. It promotes toxic consumerist lifestyles in society by trying to minimize human's original thought by substituting it with easy-access over saturated content. And it further disconnects an already disjointed people, by leaving no artist to admire or aspire toward behind the artwork.

Do not give generative AI more legal power! It is actively threading society's quality of life!
