General Comment

The copyright clause in the Constitution states that:

"To promote the Progress of Science and useful Arts, by securing for limited Times to Authors and Inventors the exclusive Right to their respective Writings and Discoveries."

When Large Learning Model (LLM) AI scrape the web to feed their programs, what they are doing is unconstitutional. Our framers recognized that without ownership of writings and discoveries, the humans who are the engines of science and creators of art will no longer have an incentive to create, thus stifling our progress as a species.

We cannot let people steal knowledge to feed LLMs. It will be the death of human progress. An industry that cannot thrive without theft is one not worth supporting.
