

PUBLIC SUBMISSION

As of: March 21, 2025
Received: March 15, 2025
Status: [REDACTED]
Tracking No. m8a-8f3c-rhrw
Comments Due: March 15, 2025
Submission Type: API

Docket: NSF_FRDOC_0001

Recently Posted NSF Rules and Notices.

Comment On: NSF_FRDOC_0001-3479

Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-1808

Comment on FR Doc # 2025-02305

Submitter Information

Name: K D

General Comment

Generative AI is not the wonder tool you believe it to be. It is a plagiarism machine that devours copyright protected materials and spits them out into a soulless hallucination of half truths or straight up lies. Generative AI steals huge amounts of information for very little benefit.

Additionally, it is a huge security risk to use a model where you don't know where the training data has come from. If you haven't trained the model on carefully selected data, you will never know if it contains malicious information that will poison the model.

Finally, generative AI has a massive negative environmental impact. The energy consumption and water usage are enormous. Energy that could be used to power grids in Texas to prevent people freezing in their homes. Water that could be used to save Californians from terrible wildfires.
