General Comment

Our entire culture and economy is built on the assumption that if you make an original creation (be it a book, painting, movie, invention, etc) you own it by copyright and you have protection from theft. Creatives toil for decades in obscurity safely that if they ever strike gold and break through to an audience, that copyright will protect them from thieves swooping in and stealing your reward. If you allow AI companies an exemption to copyright protection, you blow up centuries of established law that work and have promoted innovation and experimentation. AI is nothing but automated theft.
