As of: March 21, 2025
Received: March 15, 2025
Status: [REDACTED]
Tracking No. m8a-93pd-yfpn
Comments Due: March 15, 2025
Submission Type: API

Docket: NSF_FRDOC_0001

Recently Posted NSF Rules and Notices.

Comment On: NSF_FRDOC_0001-3479

Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-1817

Comment on FR Doc # 2025-02305

Submitter Information

Name: Jamie Kalen

General Comment

What we're promised is the future of art and writing is the death of it. I strongly oppose AI in all forms and uses. I never gave most of these sites my permission to use my words and art to build its systems, and yet it used my words and my art anyways. Opt out has only even become a recent option, which is increasingly more of an impossibility, as the way to disable the collection of data becomes harder and harder intentionally.

In college, my professor used AI to give feedback to our projects. I noticed immediately and remarked to a friend only for it to be revealed at the end of the semester by him in favor of its use. How did I know? I was a writer. He gave me an absolute breadth of feedback, most of which was fluff and very little of which was usable feedback. I write fiction, and my auto-correct also uses some AI elements, with many suggestions being wrong or just a reduction of my point.

To allow AI into every part of our life is to dismantle public education. I'm a teacher, so I often have to deal with students who don't see a point in learning how to use our language. In this way, we tell them to never struggle through learning because AI can do it better. Instead of cutting out dangerous physical labor or making it easier for those workers to exist, we cut creative jobs, the ones that require individuality and humanity instead of computation.

Please, I beg, no matter what the immediate benefits appear to be, AI is just another tech gimmick ruining our lives and we need to oppose all support and implementation of it.
