General Comment

As a cybersecurity major myself, AI regulations are a must when people use their devices on a daily basis. These regulations protect people from predatory AI behavior, such as being used to harvest more data than what is stated on privacy policies for the sake of 'AI.' Despite this, we've seen multiple apps incorporate AI using data in ways unstated in the privacy policy of the app itself (Discord, Facebook, Twitter, etc.). Executive Order 14110 should have its wording improved to be more concise and specific about its own regulations, as removing them can put the public at risk of larger companies harvesting data with AI as an excuse.
