

PUBLIC SUBMISSION

As of: March 21, 2025
Received: March 15, 2025
Status: [REDACTED]
Tracking No. m8a-9kvx-19xn
Comments Due: March 15, 2025
Submission Type: API

Docket: NSF_FRDOC_0001

Recently Posted NSF Rules and Notices.

Comment On: NSF_FRDOC_0001-3479

Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-1826

Comment on FR Doc # 2025-02305

Submitter Information

Name: Sarah Macklin

General Comment

I am a writer and artist who has familiarized myself with AI. While it can be a great tool in many cases, such as running routine scientific searches or writing repetitive coding, in creating new works it has proven time and time again to be a disaster. Many of the "papers" it has produced have been inaccurate, leading people to incorrect and often dangerous conclusions about science, health, and a number of topics. It hasn't developed the ability to tell a lie from the truth. That is something a machine isn't capable of right now.

In the artistic field, it feeds on copyrighted work from many of today's great minds to regurgitate items that lack any sort of creativity while not paying homage to the work it stole from. All of this is while using a disproportionate amount of energy and water. It has no place in the arts and certainly has no place in our government where the decisions made are often life or death for the inhabitants of this country.

Thank you.
