General Comment

As both an IT consultant and an artist, it is extremely apparent that regulations and laws need to be put in place to protect US citizens. Generative ai blatantly steals from everyone and everything crossing the line in just about every copyrights case. It must be regulated and now. They cannot be allowed to steal freely and with wreckless abandon. This isnt just images, but actual information. I perform HSRAs for many hospitals and they are in a constant uphill battle against bots and hackers using ai to exploit vulnerabilities and trick employees. The scope is unprecedented and the support of this technology is only strengthening it in the hands of this nations enemies. The sunken cost fallacy of callous unthinking corporations should not be what leads us down this path. That is the path to complete collapse.
