General Comment

I am writing to ask you to not pass the Development of an Artificial Intelligence (AI) Action Plan. Allowing major tech companies like Google and OpenAI to freely use people's content on the internet, especially from creatives like artists and actors, to train their AI software without their consent is a privacy violation. Additionally, content that is solely AI-generated cannot be protected by copyright and thus unable to be profited off of. Lastly, there is also a lack of proper regulations for AI use, which has been used to force humans into losing their jobs and contribute to the spread of online misinformation. Not passing the act will protect creatives' work and our information, both personal and otherwise, from being exploited and misused. Thank you.
