General Comment

Removing the guardrails of AI will only serve to ruin the lives and businesses of artists, authors, and professionals all over this country, by "learning from" or rather STEALING content. Additionally, generative AI of all kinds (whether it be Deepseek or OpenAI) is extremely detrimental to the environment, and unleashing its reigns will only allow it to further increase the impact of climate change, which in turn leads to more natural disasters that cost millions of lives and money. The focus on AI should be to use it to advance medical developments and other services that IMPROVE the lives of Americans. Allowing AI to reign free without restrictions is a terrible idea and will not lead the US to becoming an "AI Powerhouse", but will instead only march us closer to the dystopian fascist empire that we've been headed toward the past few months (years, really). If the Trump administration really wanted to do what's best for Americans, passing through this plan is not it.
