

PUBLIC SUBMISSION

As of: March 21, 2025
Received: March 15, 2025
Status: [REDACTED]
Tracking No. m8a-bdix-ktv8
Comments Due: March 15, 2025
Submission Type: API

Docket: NSF_FRDOC_0001

Recently Posted NSF Rules and Notices.

Comment On: NSF_FRDOC_0001-3479

Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-1853

Comment on FR Doc # 2025-02305

Submitter Information

Name: Tony Delgado

Email: [REDACTED]

General Comment

I'll keep my comments brief. For over half a century, the United States has not only been a top leader in scientific innovation but also led the world in culture and the arts. These are not coincidental achievements. From the domination of superheroes at the box office to the ubiquitousness of the cell phone, America's cultural, scientific, and economic success has depended on its imagination. Without the stories of Gene Roddenberry, in which his main characters used a handheld communicator, there would be no cell phone industry.

A key component of American imagination is that the fruits of that work will be remunerated via copyright protection. To undermine that would disincentivize creativity. Giving the fruits of the American imagination to Artificial Intelligence as fair-use training data would alienate this country from the very thing that has made it so successful.
