As of: March 21, 2025
Received: March 15, 2025
Status: [REDACTED]
Tracking No. m8a-bjie-axg6
Comments Due: March 15, 2025
Submission Type: API

Docket: NSF_FRDOC_0001

Recently Posted NSF Rules and Notices.

Comment On: NSF_FRDOC_0001-3479

Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-1857

Comment on FR Doc # 2025-02305

Submitter Information

Name: Dale Brogan

[REDACTED]

General Comment

I am an independent artist, and generative AI infringes on mine and many other artist's and writer's copyrighted work.

My copyright, my choice. AI and other companies do not have the right to my creative works, art, and writing, and they do not have consent to train their AI models on these works. They have not purchased a license for my work, nor anyone else's work, to be used to train AI and they don't intend to. They have no right to use my work any other person's creative work, or even personal selfies, but they have gotten away with it to this point due to the lack of regulations on this new technology.

The "unnecessary burdens" are protections of copyright and the creator's work. If my rights are a burden, then this is an unethical and unsustainable business. Any business whose model relies on infringing on millions of people's rights is not ethical.

Creative and intellectual property theft is just one of the many unethical parts of generative AI. If you truly want to be the lead in AI development do it ethically or don't do it at all. Tech companies are not who the government was created to protect and prioritizing their needs over the populace is absolutely a disgusting overreach. This is corruption.

AI companies have shown a flagrant disregard for the individuals they stole creative works from to train their AI. This is not something people should stand for nor sit idly by and encourage.

I do not consent to my copyrighted work being used to train AI in any way shape or form.
