General Comment

Even if I did not have strong moral objections to generative AI and how it is being used to disenfranchise and disempower human workers while stealing their labor and using it to regurgitate slop, I would still not want it being used. The power and water needed to run a single prompt far outweighs any potential "benefit" of generative AI. Simply put, I don't want a computer who is wrong half the time to think and work in the place of a human.
