General Comment

I genuinely think this is a bad idea primarily because its a tool to destabilize the economy via reducing the amount of consumers able to buy products, without purchases, businesses will not be able to continue, small or big.

and not to mention it will make all visual products (tv, movies, any media) stagnate and stall, resulting in dissatisfied customers, it will also end up making America destitute in terms of technology because it will be used anywhere it can be, this includes coding, and no matter how much code it makes it wont be error proof and will crash hundreds of systems
