Docket: NSF_FRDOC_0001

Recently Posted NSF Rules and Notices.

Comment On: NSF_FRDOC_0001-3479

Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-1878

Comment on FR Doc # 2025-02305

Submitter Information

Name: Ann Baun

Email: [REDACTED]

General Comment

I am strongly opposed to the technology currently referred to as generative "AI" because it is not intelligent or useful in any way; it is a process for creating sentences that don't make sense and have no concept of accuracy, polluting the internet with misinformation, and polluting the planet by wasting disproportionate quantities of resources. While similar technologies that use specific datasets to narrow down efforts made by actual humans can be extremely helpful and even life-saving, there is no place for generative forms iterating poor-quality "content" from stolen data. As a writer and artist, I find it offensive that this is still being marketed as a useful technology.
