General Comment

The Artificial Intelligence Action Plan is a horrid idea that does nothing more than steal from creatives both across many big industries and small businesses. From Hollywood to Indie Creators, to allow AI to take from copyrighted material would be to steal the property and creations of others on a massive scale; TV shows, movies, book authors, etc. Both these businesses, big and small, would suffer severely from this action plan and by extension, the lives of those who work in these businesses. By the extent of the damage it would do to people's livelihoods alone, it is unethical and irresponsible. Generative AI has also proven to be environmentally destructive. The resources required to run it has shown to be highly inefficient. So not only would this be economically unwise, it would be ecologically devastating. It is not worth the cost on both human and ecological life.
