General Comment

AI should not have access to all copyright works. They do not have the right nor reason to destroy copyright, plus it will only do more harm than good. If they get rid of copyright that means their software becomes free game too. Don't destroy a huge percentage of the populations livelihood for one man who doesn't even understand what he's asking for! Please!

The Fifth Amendment to the Constitution provides that private property shall not be taken for public use without just compensation. Art, books, music it's all our property!
