As of: March 21, 2025
Received: March 15, 2025
Status: [REDACTED]
Tracking No. m8a-collb-cpay
Comments Due: March 15, 2025
Submission Type: API

Docket: NSF_FRDOC_0001

Recently Posted NSF Rules and Notices.

Comment On: NSF_FRDOC_0001-3479

Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-1896

Comment on FR Doc # 2025-02305

Submitter Information

Name: Nick Pasipanki

Email: [REDACTED]

General Comment

Generative AI programs are built and “trained” on theft of copyright protected works. In all cases, these programs do little more than steal art and the likenesses of humans, mash them together, and spit out some poorly executed slop. In healthcare cases, 66% of diagnoses were incorrect or missed crucial information. For scientific research, there has been a great use of AI and machine learning to develop vaccines and cures to diseases, but this administration seems hellbent on destroying any and all progress towards the actual betterment of humanity in favor of wealth concentration for only the extremely rich. In short, i think very few uses of AI technology are even legal, let alone important to foster, and the ones that are, that could actually help our species, are the kinds of things this disgusting, fascist regime rejects outright because it could be good. End this absurd chase for generative AI dominance. This technology is being rejected by the masses. Apple is losing money because of it. OpenAI is under threat of bankruptcy due to their reliance on theft. This is a losing fad.
