General Comment

The damage this will do to arts and culture across the United States and the world is terrifying. Protecting copyright materials from being devoured by AI is paramount. This executive order is an equivalent of letting everything from a Disney movie to a classic country song being fed into a meat grinder that spews out a worthless imitation with no heart behind it.

Generative AI technology brings no value, it is only here to be a plagiarism tool that creates nothing new and destroying the environment. The electricity and water needs of gen AI technology should scare everyone in the age of global warming.

I hope that the artistic legacy of America still means something to our government officials.

Protect America's artist's protect the Art.
