General Comment

There's little reason for an individual to go into the arts anymore. Now that AI creates it at the press of a button real artists struggle to even survive on their craft.

If we rid artists of even the basic credibility of the art they themselves have built we'll very possibly lose art forever.

I compel you to think of AI as a tool that should take over the tasks humans do not wish to do - such as the laundry, the windows, or tuning up the family car. AI should not replace humans for the things that make humans feel human.

Use AI to raise the standard of living - not to steal and forge works of art.
