

PUBLIC SUBMISSION

As of: March 21, 2025
Received: March 15, 2025
Status: [REDACTED]
Tracking No. m8a-d7ns-g95r
Comments Due: March 15, 2025
Submission Type: API

Docket: NSF_FRDOC_0001

Recently Posted NSF Rules and Notices.

Comment On: NSF_FRDOC_0001-3479

Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-1916

Comment on FR Doc # 2025-02305

Submitter Information

Name: Mary Yovina

General Comment

Generative AI trained on copyrighted material is dangerous to the livelihoods of small creatives as well as destructive to the concept of IP ownership that large companies rely on. The argument that this will "promote human flourishing" does not hold up, given that the result of unlimited training on any and all creative works means the devaluation of an individual human's creative work. Not only that, the results of AI-generated algorithms are unreliable as information, inconsistent, and lacking in creativity, so even the human consumption of that data is negative. It offloads critical thinking to a computer, which then turns around and delivers false information, which humans then take as fact. Additionally, the environmental impact of running the servers required to use AI is damaging human lives.

We need to divest from AI and impose more regulation, not less.
