Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-1926

Comment on FR Doc # 2025-02305

Submitter Information

Name: Shiloh Bronson

General Comment

Artificial Intelligence must be regulated to prevent infringement on the copyrighted material of independent creatives and businesses. If it is not, those skillsets will diminish from the public eye and eventually AI will begin to train off it's own data, something which has been shown to drastically worsen the quality of its results. You will find yourself in a world where AI doesn't function effectively and a world where the skills that you intend AI to replace have been alienated by your actions and consider your business and your projects to be poison.

Do not infringe on the rights of peoples intellectual property or copyrighted materials.
