As of: March 21, 2025
Received: March 15, 2025
Status: [REDACTED]
Tracking No. m8a-dfxy-tsie
Comments Due: March 15, 2025
Submission Type: API

Docket: NSF_FRDOC_0001

Recently Posted NSF Rules and Notices.

Comment On: NSF_FRDOC_0001-3479

Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-1928

Comment on FR Doc # 2025-02305

Submitter Information

Name: C Martinez

Email: [REDACTED]

General Comment

AI is being used as an excuse for theft, and a means of stifling the reasoning process.

Big companies are shutting out small businesses and individual entrepreneurs by stealing their work online, calling it "research" when they're really trawling for material they can regurgitate and resell under their own brand.

For the government to declare this practice legal is gross overreach, denying the rights of individuals in favor of granting only those with money any rights.

It is a stifling of the individual's right to communication, creation, and earning a living, which flies in the face of American individualism and the pursuit of excellence.

Allowing AI scrapers to thief and kludge together the data it collects is no better and no more logical than allowing a cement truck to determine where sidewalks should be placed in a city. You may as well ask a microwave about nutrition because it prepares food that's put into it.

Allowing corporations to steal individuals' work is robbing people of their livelihood, which they've labored at for years. It's condoning theft, plain and simple.
