General Comment

While it's true that AI has great potential to help the world, it also has great potential to harm. As with any advanced technology, such as nuclear power and weapons, great care must be taken to avoid catastrophe.

I am extremely concerned that removing safeguards from the development and deployment of AI will result in financial decimation of creative artists, writers, and musicians, as well as increase the risk of unintended side effects of AI that are devastating to large sectors of the Earth's population.

I urge you to tread with caution. The profits of the few should never outweigh the safety and security of the many.
