General Comment

Artificial Intelligence is a stain on our ability for future development. It's a technological dead end with severe hallucination issues that will never be overcome, and a drastic environmental impact that makes the car industry blush. As someone who works in a creative industry full time, AI has been a nightmarish inclusion to have to deal with.

We should make this actual waste of resources illegal, it does not serve our country nor does it serve our citizens. The United States is weaker with artificial intelligence running. As someone who loves our country, I am begging you to do whatever you can to disable the tide of this economic virus before it cripples our entire economy.

We stand at the precipice of a disastrous end to the United States' ability to function as a society, and the acceleration of that downfall is AI's only perceivable goal.
