General Comment

Professional artist AND writer here.

I have seen my name on a list of screenwriters whose work was STOLEN by AI engines that compensate neither me, as a copyright holder, nor the copyright holders of work I did for hire. The resulting training is being used to PUT ME OUT OF A JOB.

Worse... the results of this theft generate a product that is universally seen as inferior to the work of actual writers and artists. Though there is SHORT TERM value in cost cutting for the users of AI, the long term damage, both to those same users AND the victims of AI, are huge. Audiences (consumers) will NOT shell out their money for a product that is both demonstrably WORSE than what they're used to AND costs the makers less to make, or nothing at all.

This is a ponzi scheme and pump-and-dump scam being perpetrated by a few greedy tech-bros.

AI is NOT inevitable... but its failure to live up to the promise IS inevitable... and its unethical nature is BEYOND QUESTION.

Step away. Recommend against. Do not allow this scourge to destroy so many lives.
