

PUBLIC SUBMISSION

As of: March 21, 2025
Received: March 15, 2025
Status: [REDACTED]
Tracking No. m8a-cajt-x9s4
Comments Due: March 15, 2025
Submission Type: API

Docket: NSF_FRDOC_0001
Recently Posted NSF Rules and Notices.

Comment On: NSF_FRDOC_0001-3479
Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-1947
Comment on FR Doc # 2025-02305

Submitter Information

Name: Paul Cory
Email: [REDACTED]

General Comment

Any AI plan that does not respect the rights of copyright holders undermines the rights of writers, artists and creators in every field, and the basis for a large swath of the economy. Legitimizing copyright theft simply because it was done on a massive scale and for the benefit of a few wealthy people is not good public policy.

In addition, AI regulations must put address the quality of the data AIs are trained on, and hold AI companies accountable for when their products "Hallucinate": eg. cite articles or studies that don't exist to support conclusions that actually have no basis in fact, or simply spew forth complete inaccuracies.

And finally, AI must not be allowed to make decisions that take effect without human review. The AI false positive rate when used to detect "fraud", for example, is as high as 80%. A program that is so consistently wrong cannot be allowed to execute decisions on its own, and the regulations should reflect that.
