As of: March 21, 2025
Received: March 15, 2025
Status: [REDACTED]
Tracking No. m8a-eck9-w8ck
Comments Due: March 15, 2025
Submission Type: API

Docket: NSF_FRDOC_0001

Recently Posted NSF Rules and Notices.

Comment On: NSF_FRDOC_0001-3479

Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-1949

Comment on FR Doc # 2025-02305

Submitter Information

Name: Katherine Laczin

Email: [REDACTED]

General Comment

Machine learning done in restricted, tight, non-creative areas? Maybe. Though it still too-often outputs dangerous and incorrect information, having it strictly monitored is the only way we can prevent our capability as a nation from falling for pleasant lies like sheepish fools.

We can all agree - theft should not be legal. Yes? Then Generative AI (and any company or person using it) should never have been allowed to illegally disregard the copyrights already granted to every person who creates a work. A metal box with a screen is not human, so don't fall for that particular ruse.

It's theft. It's not a valuable tool in the slightest. It's destroying the United States of America's reputation, strength, and dignity. It's embarrassing.

Generative AI 'outputs' unceremoniously stealing from billions of creative laborers and intellectual properties is, and always has been, wrong. And you know it - because it is, in its entirety, anti-humanity. If we let this blatant plagiarism toy control us, say goodbye to a bright future.

Do you want a bright future for you and your loved ones? Or do you want a metal box soldered to your face that demands your wallet until you've nothing left but fleshless bones?
