## General Comment

Any form of AI Action Plan developed, should protect the rights, privacy, and safety of its countries citizens. Prioritizing unhindered access to large tech corporations like Google and OpenAI, in an arms race to the bottom, only de-incentivizes the American people's own incentive for creative innovation.

The unregulated developments of Gen AI systems, have already deeply wounded potential opportunities for work in the creative industry. Hundreds of thousands of individuals are competing for far more limited positions, and no longer able to contribute to this country's economy with their unique skill sets, that Google and OpenAI have brazenly scraped, disseminated, and made clear how little respect that hand crafted works and business by the American people, truly deserve. The entire art team I was a part of in 2022, was laid off short after some of the first burgeoning tech related to Generative AI. Since then, positions similar to the one I had been a part of for 2 1/2 years, are far more scarce, and it is only becoming harder.

There should be explicit transparency for AI generated content under the Administration's AI Action Plan, with an emphasis on a fair and competitive marketplace for the people. Do not let the fear mongering tactics of a few big tech companies, monopolize the interests of the American people.
