General Comment

GenAI is nothing, but a theft machine that leads to stagnation and on top of that, letting GenAI to deliberately sidestep Copyright Laws means that NO ONE can protect their own work, thought, ideas and etc as you essentially allowing anyone, who wants to cash in on our own property then it's legally allowed. You don't seem to understand the dangers that GenAI is bringing in to our sphere especially more than ever as GenAI has no safeguards on them still, which even with Copyright Laws, we see the harm that GenAI has done by stealing jobs of folks and the misinformation, but then again, given how things are going in this country; you do want misinformation to spread through our country. Not to mention, you should know that GenAI also would poison the wells of our other countries' own laws that we also should've follow given our many collaboration with them as well. I don't want to see more people lose their jobs/ inspiration because the tech industry has no respect for our rights, privacy, thoughts, etc for the sake of a quick buck that would no doubt be lead to ruin as they need a man to fix their issues as GenAI is still not perfect and will give false positives etc.
