As of: March 21, 2025
Received: March 15, 2025
Status: [REDACTED]
Tracking No. m8a-exip-xjoq
Comments Due: March 15, 2025
Submission Type: API

Docket: NSF_FRDOC_0001

Recently Posted NSF Rules and Notices.

Comment On: NSF_FRDOC_0001-3479

Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-1963

Comment on FR Doc # 2025-02305

Submitter Information

Name: Melissa Gibson

General Comment

I am against AI. While I think that it has potential in the medical fields to do good it has the opportunity to do a great deal of harm without serious regulation. No one seems to be interested in doing regulation. One of the biggest issues is copyright law. AI companies want to undo copyright law for the benefit of them but do not want to see the continued protection of the smaller artist. AI has devastated the creative fields, leading AI to being used in the gaming industry leading to mass firings. AI's quality is inconsistent. There is also the fact that using google search the results have the AI result has often been a mixed bag of bad answers. If AI is resulting in bad answers that people are getting google search results, what else is it doing wrong that we don't know about? There are time and time again multiple articles pointing out these issues with AI. There is also the heavy reliance which is 'dumbing' down people. You want a smart America? Don't allow the reliance on this technology to write essays. Don't allow AI in the classrooms. People treat the AI results like its facts when it can be wrong. There have also been articles about using AI like it's their therapists and AI is not a trained therapist. I'm afraid of what kind of behavior this is resulting in. There from NBC news how a teen killed themselves because of AI: <https://www.nbcnews.com/tech/characterai-lawsuit-florida-teen-death-rcna176791> and it isn't the only one I have seen like it. AI is a technology that we are moving to hard and to fast on. I'm sure other people can say it more eloquently than me. I realize the USA has concerns about China developing a better AI. But we can't be reckless.
