General Comment

I oppose this Action Plan on the base that it requires that copyrighted works and private information be used to train AI systems. This is a huge infringement on copyright law, both for corporations and private individuals. It will allow AI tools to directly steal from these entities and will lead to a collapse of the economy. Current AI tools are not meeting the expectations of consumers and government investment in these AI systems through public funds is not in our interest when much of our public infrastructure is worthy of more critical investment.
