

PUBLIC SUBMISSION

As of: March 21, 2025
Received: March 15, 2025
Status: [REDACTED]
Tracking No. m8a-fe8o-p424
Comments Due: March 15, 2025
Submission Type: API

Docket: NSF_FRDOC_0001

Recently Posted NSF Rules and Notices.

Comment On: NSF_FRDOC_0001-3479

Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-1998

Comment on FR Doc # 2025-02305

Submitter Information

Name: Julia LaFond

[REDACTED]

General Comment

Any use or expansion of AI and related technologies must be in the interests of the American public. Therefore, the following criteria must be met:

- Copyright and intellectual property must be protected, particularly in the case of small and independent creators who have a limited ability to enforce their rights against tech giants. This means that anyone seeking to train AI models must do so only with the express agreement and consent of creators, and creators must have the option to revoke the agreement and have their creations removed from training models. Creators should also get reimbursed for their contributions if they choose to opt in, and should receive attribution whenever possible. Finally, it must be the responsibility of the entity in charge of the AI to determine whether they are rightfully using training data, and must face tangible penalties for using pirated material (or other unlawful materials)
- More generally, to preserve Americans' right to privacy, any training based on data generated by using websites or services (e.g. social media), should be opt-in by default. In addition, any site training on people's data must be transparent about what data they collect and how they use it.
- Any expansion of data centers cannot compromise the quality of life of Americans. For example, their water use must not exacerbate droughts or deprive Americans of clean drinking water, and significant increases in emissions or fossil fuel consumption are unacceptable, as they will lower the quality of life of US citizens in both the short and long term.
- Safeguards should also be put in place against labor exploitation of workers in foreign countries: both in the interests of ethics, and to enforce a baseline of acceptable working conditions that will only benefit American workers.
