General Comment

You realize letting this pass also gives countless people free reign to lie about making AI programs and just freely steal the information and subsequently make all the effort towards this innovation crash, right? And trying to undo copyright will make it worse, right?

You won't open new doors or improve the economy as a take that to other countries, this will simply accelerate our own economic crash out. It's probably best you don't sign this into law. People are unpredictable and this law will most certainly give those outcomes free leverage and make AI models completely useless.
