

PUBLIC SUBMISSION

As of: March 21, 2025
Received: March 15, 2025
Status: [REDACTED]
Tracking No. m8a-fjrz-zn4i
Comments Due: March 15, 2025
Submission Type: API

Docket: NSF_FRDOC_0001

Recently Posted NSF Rules and Notices.

Comment On: NSF_FRDOC_0001-3479

Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-2009

Comment on FR Doc # 2025-02305

Submitter Information

Name: Eliot Flynn

Email: [REDACTED]

General Comment

Generative AI has no positives to bring to the American people - or anyone else, for that matter. Generative AI has sped up the erosion and undermining of human creativity, has already caused communities to cast doubts on the genuine creations of creatives, and serves no purpose other than to disrupt, confuse, and deceive. While at first glance, the idea of being able to generate music, text and art in the blink of an eye seems impressive and convenient, the long-term benefits of this technology simply don't exist. Google search results are now polluted with fabricated AI-generated results which are unhelpful and obstructive to education. Budding artists are giving up on their dreams, because generative AI can create something more impressive in an instant - using stolen data, at that - than they could muster in years.

Let's not forget that generative AI could not exist in the first place without the mass processing of people's life's work, en masse, without permission, AND using an incredible volume of resources and adding more carbon to our atmosphere. If America believes in innovation, it needs to understand the difference between true innovation, and what Generative AI represents.
