General Comment

The reckless and illegal methods technology companies have employed to develop so-called "Artificial Intelligence (AI)" cannot be allowed to continue. Their flagrant abuse of, and contempt for, intellectual property and copyright laws not only must stopped, these companies should be forced to face the same consequences any other organization or individual would normally face if they themselves violates these same laws.

These companies have produced nothing of value, but have caused incalculable damage in their wake. It should not be allowed to continue. The American people should not be on the hook for these companies short-sighted and ill-fated business investments. Just like everyone else, if your business "cannot exist" without breaking the law, then it shouldn't exist. The law should not be changed instead to let it.

Outrageous this even needs to be put into words, yet here we are.
