General Comment

There shouldnt be further development on Ai. It was built with data without the consent of the people that provided that data. It is a huge copyright issue that people have tried to fight against.

Ai also has a huge negative impact on the climate and artist. It takes away jobs for so many people and it is the government's job to provide jobs to their people. It used a lot of energy just to create one image and even if that is improved on, the planet is dying already. Leave it alone.

Om top of that ai has been used to create negative, sexual and frankly disgusting images of many people. Deep fakes of non consenting people among other things.
