General Comment

AI generated imagery exploits the work of artists by violating copyright laws and refusing to credit or otherwise provide compensation. It creates and actively promotes misinformation, and takes an immense amount of energy that becomes more and more damaging as we continue to hurdle towards climate catastrophe. It is being used by corporations as a get rich quick scheme that cuts out human intelligence and creativity with very little focus on any practical or beneficial applications. It is a weapon that could have been a tool, and it highlights the disregard for people, art, accurate information and the planet.
