General Comment

Generative AI is built on a vast database of stolen copyrighted material, and those vital copyright laws are the "unnecessarily burdensome requirements" this plan seeks to overturn. By catering to the interests of monopolistic technology corporations, this plan threatens to destroy the USA creative economy as we know it, potentially killing millions of jobs across the entertainment and arts industries.

Pursuing American AI dominance at all costs will do incalculable harm to hardworking Americans and small businesses. Do not let tech giants dictate policy--their only goal is to make themselves richer, no matter what xenophobic rationalizations they give.
