General Comment

The use of generative AI has never been useful to anyone. It is inaccurate, it loses money, it damages the environment, and it steals the work of real human beings. People lose their jobs to AI programs that do not work while the people that remain employed are forced to do more work to compensate. Using AI diminishes one's critical thinking skills. The more we use AI, the dumber we get. AI weakens America as a nation. If the United States must lead the development of AI in any way, it should be in regulating it out of existence.
