

PUBLIC SUBMISSION

As of: March 21, 2025
Received: March 15, 2025
Status: [REDACTED]
Tracking No. m8a-gjws-xgf3
Comments Due: March 15, 2025
Submission Type: API

Docket: NSF_FRDOC_0001
Recently Posted NSF Rules and Notices.

Comment On: NSF_FRDOC_0001-3479
Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-2067
Comment on FR Doc # 2025-02305

Submitter Information

Name: Alex Williamson

[REDACTED]

General Comment

If there is no option but to move forward with endorsement of AI despite mass public backlash against the tech, it is imperative that restrictions and regulations are placed on it to protect individuals and businesses, especially when it comes to generative AI models.

Generative AI models need to have private databases that only contain data gained consensually, and users of YouTube, X, Instagram, Facebook and all other social media sites need to be notified in advance if their posts will be used to train AI models so they can easily opt out via in app settings if they so choose. Failure to allow users to opt out, especially on a major site such as X which had many users build up followings long before the site changed its name, should be met with swift legal action as it can be considered both intellectual property theft and unlawful invasion of privacy. This needs to be extended to protect businesses as well, as OpenAI and Google's push for copyrighted works to be fair game for their databases would be disastrous for the copyright system as a whole and has the potential to completely demolish creative economies in the United States. Failure to recognize this will hurt our country far more than it will ever help it and will restrict the freedom of Americans to reliably pursue a career of their choosing, keeping many from being able to achieve the American dream.
