General Comment

AI is actively plagiarizing artists and writers and putting people out of jobs so a machine can spit out garbage that a real person needs to put in work to correct. Tech companies are desperately shoving it down everybody's throats despite it being so obviously flawed because they invested so much in it and don't want to accept that it's not panning out. It also uses up a ridiculous amount of energy just to cause problems. It absolutely is not a replacement for real human work and attention and it's shameful that the government is bowing down to the pressure from self-important tech CEOs to rely on it.
